MoBi4all Wintersemester 2026/27

Vortragstermine: Montags, 18 - 19.30 h, **INF 306, SR 19**

Stand:

Datum	Vortragende*r	Vortragsthema
19.10.2026	Stefan Jordan	Nutritional Microbiology and Immunology
26.10.2026	Murat Sunbul	Engineering RNAs to visualize biology in super resolution
09.11.2026	Lisa Gölz	Human Models and Fish Embryos in Pharmacology and Toxicology
16.11.2026	Jan Budczies	Bioinformatics in Cancer Research
23.11.2026	Aysel Ahadova	When DNA Repair Fails: From Molecular Mechanisms to Cancer Prevention
07.12.2026	Miriam Breunig	Drug Delivery in Immunology
14.12.2026	Alexis Maizel	How Plants shape themselves
11.01.2027	Amit Agarwal	Feeling the Force: How Mechanical Sensing by Oligodendrocytes Shapes Brain Wiring
18.01.2027	Chris Carnie	Understanding and exploiting chemotherapy-induced nucleic acid damage
25.01.2027	Rob Russell	Identifying clinically relevant genetic variants via protein bioinformatics
01.02.2027
